IT News Letter

No. 1, Vol. 1, July 2014

## Imran Mujaddid Rabbani

PhD CS Fellow

Instructor IT / Incharge of I.T Department

## Waqas Ilyas

MS CS Fellow

### What Are We Working On?

- The IT Department continues to work on a number of initiatives, including website up-gradation (www.pja.gov.pk), registration of trainee participants, conducting Skype and video link lectures from worldwide and providing support to seminars, workshops and conferences.
- IT services also offers one-on-one and classroom based training to the participants for the Microsoft Office 2010 Suite, including Excel, Word, PowerPoint and typing and Internet surfing with basic search techniques.

### Important Features of the month

- This was the first time we have been able to start Skype lectures of international speakers from USA and UK. In this regards, professor of Human Rights Law King's College, London Mr. Robert Wintemute and Ms. Peggy Hora, retired Judge Superior Court of California, USA shared their

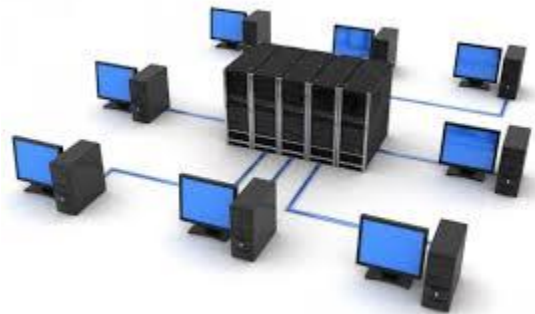

thoughts with the participants of short training courses conducted during the month of June 2014. Role of IT was to do the arrangements of these lectures and set the infrastructure for the smooth functioning of lectures.

- Video Link lectures for District Judiciary Lahore were also arranged by the Academy. IT department has provided full technical support in this regard.

- The Department provided full support for the organizing the CEEJ conference on Water and Environmental Justice. The services include printing of Panel Flexes, live video coverage, decoration of hall, multimedia projection, sound system and brochure designing.

- The IT has increased its Internet bandwidth, redesigned, and replaced much of the network infrastructure over the past several months. These changes have greatly improved the speed at which users across all offices of the Academy can access the web or utilize PJA software systems over the local network.

- The new IT equipment has been tendered for the enhancement of department and serves as a state of the art vision of the Academy. This includes server, laptops, desktop computers and heavy duty printers.
